

PRO TAURIN

Nutritional supplement

To be used as an additive when food does not contain sufficient taurine.

Taurine is a vital nutrient which is not produced in sufficient quantities in cats' bodies. In order to meet your cat's taurine needs, simply add a small amount of Pro Taurine to its food every day. Pro Taurine is odourless and flavourless and does not affect the taste of cat food.

Dogs produce their own taurine. Cats only produce small amounts which is why they must be given taurine as part of their diet.

Free from fillers and emulsifiers.

Feeding recommendation

Cats: 200 - 500mg of taurine per day, mixed into food.

Dog: to be used as required

The enclosed measuring cup (level) holds 250 mg taurine.

Ingredients:

Taurine

Analytical components:

100 % crude protein

0 % crude fat

0 % crude fibre

0 % crude ash
