

CALCIUM

Nutritional supplement for barfers

Pure calcium from a natural source.

An important consideration for feeding cats and dogs in ensuring that the food they are given contains a little more calcium than phosphorous.

Meat does contain phosphorous but generally only very little calcium or none at all. This deficiency can be compensated for through the (careful) addition of calcium.

Our calcium carbonate is made of marble and is therefore naturally sourced, whereas many types of calcium citrate used are often synthetically manufactured.

Feeding recommendation

Add to food in order to meet nutritional requirements of your pet.

Ingredients

Calcium carbonate (sourced from marble) with 39 % Calcium

Ingredient profile

0 % raw protein, 0 % raw oils and fats, 0 % raw fibre, 100 % crude ash

Product information

Nutritional supplement for dogs and cats
Contents: 250g
